

# Block Explorer

The Open Campus block explorer provides a comprehensive and user-friendly interface for monitoring and analyzing network activities. It is designed to offer key insights and information beneficial for both regular users and developers. Features of the Open Campus block explorer include:

- Address Balances: Check the balance of any address on the network.
- Transaction History: View detailed transaction records.
- Verified Contracts: Access and review verified smart contract codes.
- Smart Contract Code and Execution: Examine the code and execution details of smart contracts.
- Network Statistics: Get up-to-date information on network performance.
- Mining Information: Monitor mining activities and related statistics.
